PT Cikarang Listrindo Tbk

POWR • IDX • Sektor Power Generation / Utilitas

KEY TAKEAWAYS & HIGHLIGHTS

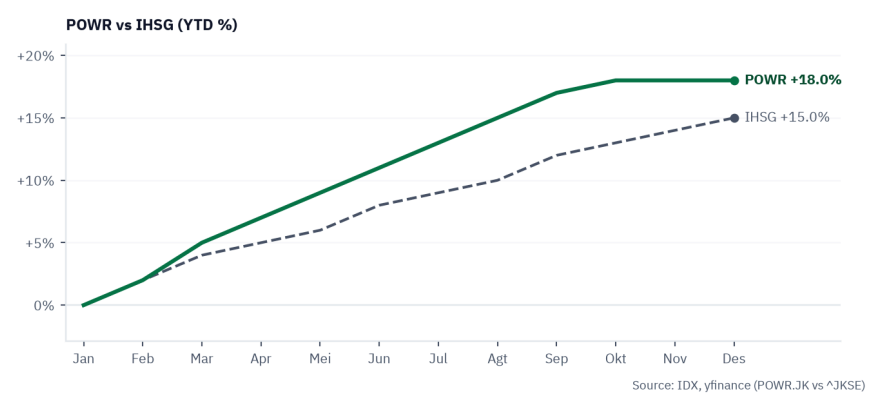

- POWR = pure-play power generator untuk kawasan industri Cikarang — captive offtake menjamin base load, tapi PLN tariff renegotiation 2027 jadi risiko utama.
- 1H26 revenue USD 412 juta (+4% y/y), EBITDA margin 28.4% — turun dari 31.2% di FY25 akibat coal ASP volatility + maintenance schedule.
- Capacity expansion 1.384 MW (+150 MW dari FY25), 2.520 customers, EAF 91.2% — utilization tinggi tapi jenuh di Cikarang industrial estate.
- DCF blended FV Rp 614 (WACC 9.8%, terminal g 2.5%), margin of safety 15%, downside -33% dari harga Rp 915 (3 Sep 2026). Risk/reward tidak menarik di level ini.

3 Pilar Utama Tesis Investasi

1. PLN tariff renegotiation 2027 = binary event

Captive offtake via PLN menjamin base load, tapi renegotiation 2027 bisa reset margin toward 22-24% range (vs current 28.4%).

2. Cikarang industrial demand saturated

2.520 customers = mature estate, growth incremental — capacity expansion 150 MW sudah pre-sold ke existing tenants.

3. Renewables contribution masih kecil

12% revenue share, margin 22.1% — meaningful growth optionality tapi butuh capex IDR 920 bn 2026F.

Perbandingan Peers & Analisis Risiko

Exhibit 24 Perbandingan Emiten Power generation peers regional

Sumber: IDX, laporan perusahaan

Ticker	EV/EBITDA	Capacity (MW)
PGEO	7.2	7200
JSMR	9.1	n/a (toll)
POWR	8.5	1384

Faktor Risiko Utama Spesifik Sektor Power Generation / Utilitas

PLN tariff renegotiation 2027

Captive offtake via PLN menjamin base load, tapi renegotiasi 2027 bisa reset margin toward 22-24% (vs current 28.4%).

Coal ASP volatility

Coal price 2026-27 volatile; HBA index bisa naik 20% jika China demand kuat.

Cikarang industrial demand

Pelanggan kawasan industri Cikarang mature (2520 customers) — incremental growth limited.

FX risk (USD reporting)

Revenue USD tapi capex USD; IDR strengthening bantu margin tapi hurts USD-denominated debt service.

Rooftop solar disruption

PLN rooftop solar program + industrial self-generation bisa erosi captive demand 2027-30.

Renewable PPA roll-off

12% revenue dari renewables — kontrak PPA 5-7 tahun, sebagian roll-off 2027.
